

Rock Locations South of Manitowoc, Lake Michigan

The following **Information and GPS Coordinates of the Rocks located south of Manitowoc** is being provided by NEWGLSF as a safety precaution for area fishermen. **Please note: There may be some additional dangerous rocks in this area, but these were the only ones that were verified on about 15 trips.** The depth of water above the rocks does change, therefore **I would recommend reducing the depth of water above each rock by 1 foot at this time**, since the Lake Michigan water level is down about a foot since last October 2010. If you find any additional rocks while fishing in this area please record the GPS Coordinates and the approximate depth of water both around the rock and water above the rock and then contact either Mike Rusch or Jack Resch. There were several other coordinates provide to NEWGLSF, but we were unable to verify the locations of these rocks based on the coordinates provided. **ALT was 579 Feet Above Sea Level when these coordinates were recorded. This information should **not** be relied upon for navigational purposes.**
